

Bar Code Readers

Bar code readers greatly simplify attendance tracking. Scan the bar codes of people present and the system will mark those who are absent. You can also scan bar-coded asset tags for the Fixed Assets module. You get double the information with half of the effort. Scan the bar codes of attendees from a remote location with the miniSCAN portable bar code reading device.

Features and Benefits

Corded Bar Code Readers

- Displays data on terminal for validation
- Reads a variety of bar codes. Examples: membership codes on attendance sheets, codes on participant badges, contribution envelopes, fixed assets tags
- Gives high first-read rates
- Reduces data entry time
- Increases data entry accuracy

miniSCAN

- Small, portable, lightweight, ergonomically designed
- Large 0.5 GB memory capacity
- Internal lithium ion battery that charges with included USB host cable
- A 24-hour batch/12-hour Bluetooth mode battery life insures well over single shift scanning performance on a charge
- Scan and Delete buttons can be used to add or delete data (delete button can be disabled)
- Easy and intuitive to use – just point, click and scan
- Connects easily to your computer for quick data import into Shelby Attendance
- CS1504 miniSCAN – v.5, Arena and XP compatible
- CS3000 miniSCAN – v.5, Windows 7 or Vista compatible

Requirements:

- Attendance, Check-In, or Fixed Assets
- USB

Laser Bar code Scanner

Omnidirectional scanner easily reads bar coded ID badges from almost any angle. Makes family check-in with the Check-In module a breeze.

Point. Click. Scan. Attendance data entry just got easier. The miniSCAN is small enough to fit in your pocket and it is extremely affordable.
