

Canon CR-Series Check Scanners

Canon's CR-Series Check Transport products are designed to enable users to benefit from the ShelbyTELLER module. ShelbyTELLER is a complete, Check 21-compatible, electronic check processing software. This hardware allows your system to scan and capture both front and back of check images, tithing envelopes, or other financial documents. You can also use this functionality to scan directly into Contributions.

Features and Benefits

- The Canon CR-50 scanner meets the requirements for distributed check and remote deposit capture, offering affordability, high performance, and ultra-reliable design.
- The Canon CR-80 check scanning device offers unmatched image quality and reliability for check capture at the first point of presentment.
- The high-speed Canon Check Transport CR-135 scans both sides of 135 checks per minute and simultaneously reads the MICR (Magnetic Ink Character Recognition) characters using its built in magnetic head.
- The number of checks able to be scanned per minute is easily recognizable by the scanners' names (e.g., Canon CR-50 scans 50 checks per minute; CR-80 scans 80 checks per minute, etc.).
- Supported operating systems: WIndows XP, WIndows Vista, WIndows 7.

Requirements:

- Contributions, Donors and Gifts, Accounts Receivable, Bank Reconciliation, or Remittances
- USB port
