

# Check-In Hardware

Are you searching for a way to implement a check-in or nursery security system AND quickly track attendance? Integrate your software with approved hardware for a complete check-in system.

## Features and Benefits

### Finger Vein Scanners

Use biometric Finger Scanning to eliminate ID Cards, safeguard members and children, and offer a more convenient user and staff experience. Biometric technology has proven to be the most effective and affordable solution for the safe management of member information.

### 21.5" All-In-One Touchscreen PC

The 21.5" All-In-One Touchscreen PC saves valuable desktop space by having the entire PC inside a slim LCD Flat Panel. The keyboard and mouse can be removed, making it an ideal solution for kiosk applications.

### Godex Direct Thermal Printers

These economically priced direct thermal printers are perfect for member/visitor badges and wrist bands. These printers have a small space-saving design, including a wall mounted feature. Very easy to use. Print labels, receipts or wristbands.

### Zebra Check-In Label/Receipt Printer

The Zebra Check-In Label/Receipt Printer brings power to applications with a space-saving, desktop-size, four-inch printer. It offers the flexibility of printing labels, receipts or wristbands. You set up the design, load the appropriate stock and the printer does the rest.

### Omnidirectional Scanner

The Check-In Omnidirectional Bar Code Scanner offers scanning performance in an ergonomic hand-held design. It easily reads bar-coded ID badges from almost any angle. Combine with a touchscreen monitor to make family check-in with the Check-In module a breeze.

### Label Printer

The Check-In Label Printer boasts more of the things that you want from a label printer, such as more versatility (prints die cut labels AND durable white paper or film tape), more speed (up to 50 labels per minute\*), and more value (wide feature set). Simply print quick, beautiful labels, name tags, etc., from your Check-In software.

*\*Standard 4-line address label, text only*

## Requirements:

- Check-In
- USB or Ethernet port

This 21.5 inch USB touchscreen PC makes member check in a breeze. Easy setup and intuitive design for member and visitor interactions.

The **Zebra** thermal label/receipt printer offers the flexibility of printing labels, receipts or wristbands. You set up the design, load the appropriate stock and the printer does the rest.

Available in USB or networkable (Ethernet) options.

Omnidirectional scanners easily read bar coded ID badges from almost any angle. Makes family check-in with the Check-In module quick and easy.

**Godex** thermal label printers are wall-mountable.

Available in USB or networkable (Ethernet) options.

Use the label printer to create child claim tickets, name tags or labels for possessions left in child-care area (ex. diaper bag).
