

MinistryLINQ

Shelby Systems has partnered with MinistryLINQ to provide its customers with an authorized provider for processing payments directly from our software, improving integration and reducing manual efforts. MinistryLINQ offers the latest processing technology using a fully certified Level 1 PCI-DSS platform and PA-DSS compliant solution. It is an end to end solution provider handling all risk and underwriting functions, initiating its own merchant and electronic check accounts and providing excellent service and support through assigned Relationship Managers.

Organizations are required to provide proof of PCI (Payment Card Industry) compliance by being authenticated by a Qualified Security Assessor (QSA). For those that need assistance, MinistryLINQ is proud to have partnered with SecurityMetrics to offer a comprehensive PCI compliance program. Any organization accepting Visa, MasterCard, American Express, Discover, or JCB is required to meet strict industry standards regarding Payment Card Industry Data Security Standard (PCI-DSS). MinistryLINQ/SecurityMetrics PCI Certification Program provides you with the tools necessary to meet the standards and remain in good standing. Some of the benefits that help you meet and maintain compliance include:

- Unlimited port scans
- Assistance in taking the required Self-Assessment Questionnaire
- A comprehensive FAQ section to help you find any information you may need
- Access to SecurityMetrics' security experts

Enrollment in the PCI Certification program is mandatory for MinistryLINQ customers but can be waived by providing proof of certification from a QSA that meets the Payment Card Industry Security Standard Council requirements.
