

Shelby Church

Powerful Church Management Software

Our popular module-based architecture will accommodate your changing needs as your church membership grows, as computers are added & updated, and as you expand your staff. We partner with a wide range of vendors to provide integrated products, boosting the power of our software. Build your own system designed around your specific needs and security concerns.

Our exceptional customer service technicians understand how churches operate and the details that are important to your ministry. Every Shelby v.5 system is built around a centralized database to eliminate double-entry and synchronization issues. Centralized data is critical for producing the reports you need to track your progress and plan for the future. We also provide convenient onsite and online educational options to keep your staff and volunteers trained.

Shelby Church Features

Membership

Store information related to people who are involved in the life of the congregation. Track information related to organizations, classes and committees to communicate more effectively.

Attendance

Track as much data as your organization requires. Note trends for prompt follow-up needs to help you "close the back door."

Check-In

Improve the speed and efficiency of your attendance tracking. Assure peace of mind by implementing nursery security capabilities with receipts, labels and time-stamped records to help you know where your members are at the touch of a button.

Servant

Match volunteers with ministry positions based on spiritual gifts, passions, skills, talents and interests.

Contact Management

Easily assign and manage tasks, effectively ensure staff and volunteer accountability, and efficiently track the progress of assigned tasks.

Contributions

Record giving history and associate it with pledges, purposes and Membership information. This allows you to prepare giving statements for contributor tax records and enables you to track giving trends.

Groups

Manage the various kinds of small group models - basic Sunday education classes, cell groups, G12, 5x5, affinity groups, and specific ministries such as Purpose Driven groups.

Registrations

Track relevant details related to event attendees and record payments. Print name badges, photo directories, and activity rosters with event attendees to export data for personalized confirmation mailing or receipts.

Resource Calendar

Assign people, places or things to specific dates and times to organize your activities. Review and approve events for specific departments to avoid scheduling conflicts.

Reaching

Contact management tool for your outreach and evangelism departments. This module also helps you manage your ministry and outreach efforts when working with visitors or members who need special support.

Frequently Asked Questions

How secure is my data?

The data resides on your servers so you have the ultimate determination of who can access it. You are able to set user security levels according to roles within your church staff, down to the individual user.

How in-depth is the training?

Shelby v.5 is intuitive to use. Ongoing professional training services are available for all levels of users and administrators. Additionally, we have an extensive collection of online videos and documentation to assist with your training needs.

How customizable is v.5?

You have the ability to customize user level security rights and field names.

What is the reporting like?

Users can create their own reports using the simple, yet extensive, Selections & Listing area. There are numerous existing reports along with sorting and filtering options. Custom reports can be created and pushed to User Dashboards for ease and speed.

Does it support children's check-in?

Yes! Secure check-in and check-out can be performed. Attendance is tracked in real time and you can customize the look of each kiosk for a "wow" experience. Check-out is controlled by your predetermined systems and security preferences – ensuring best practices for child safety.

Does Shelby v.5 integrate with Arena?

Yes, Shelby v.5 co-exists with the Arena database and can automatically update common fields. Changes in v.5 can be set up to be automatically reflected in Arena. All of this is done behind the scenes without the need for user interaction.

What is the difference between Shelby v.5 and Shelby Arena?

Shelby v.5 is module-based while Shelby Arena is browser-based. Both contain advanced membership management features that can keep your ministry organized and on track.

"When other churches ask what software we use – I always point them to Shelby. We have the best relationship due to their special care for their users. They continue to strive to improve and enhance their software every day. They are quick to hear the needs of the church and provide a solution. Their support line is extremely easy and fast, too. Not only is Shelby a good software product, but I find it is flexible to meet the needs of small and large churches regardless of the denomination. If you want progressive church software – Shelby is the best."
