Membership

Overview

Community within your church is built on nurturing relationships with your members. In today's world, that means connecting with your congregation beyond the walls of the church. Whether you're using your laptop or mobile app to update interactions, plan and manage groups, send mass emails or add information for visitors you're meeting on-the-go, the church management tools you rely on have to be flexible and adaptive.

ShelbyNext Membership Features

Child Check-In

Give parents the security they need and the flexibility they need with Child Check-in through ShelbyNext Membership. Our child check-in feature offers a kiosk mode, an iOS app, and the ability to text or call parents should an emergency arise. These options give your church the flexibility to manage multiple check-in stations in your church building or remote check-in through the app to efficiently organize and effectively manage your children's ministry.

Member Insights

ShelbyNext Membership software provides detailed reports to track attendance, giving and trends. Gain insight on ways to engage members or visitors who may be slipping through the cracks. View custom trend analysis and create reports, integrate your databases with third-party systems, and mass import/export data to make tracking much easier and faster.

Church Member Access

Providing your church members the ability to view and edit their profile, add family members, access and print giving history and more is a feature they will love. For your staff, this feature contains a searchable database of individual groups and encourages your congregation to engage and join these groups online. What does this mean for your staff? More time that can be spent on ministry and not administration.

Integrated Mobile App

Some of the most basic management tasks of your ministry are not going to take place in front of a computer. We've created a robust mobile app to handle many of the situations that can arise in your day-to-day life. Whether you're managing members and groups, tracking interactions, recording attendance, or sending mass messages, we have you covered.

Calendar & Room Reservation

Simplify and streamline your small groups and events with the calendar features in ShelbyNext Membership. Manage all church reservations in one calendar. We give you the ability to reserve equipment you need, plan specific room setups and more. Keep your members updated by syncing your ministry calendars onto your church website.

Mass Contact

Create and send mass messages directly from your ShelbyNext Membership Admin. Choose to send an email, text, or voice message to any group or list of people. Use any criteria to build your contact lists, such as absences, class membership, age, etc. Schedule messages in advance for delivery at a later date or time.
