

Donation Kiosk

Arena's Donation Kiosk module allows members to tithe and donate to your church with a quick swipe of a credit or debit card. A simple touch-based user experience allows members to locate their family information via phone number, enter gift amounts to specified fund(s) and complete their transaction with a simple swipe of their debit card.

Features and Benefits

- Allows members to give by simply swiping their credit or debit card
- Members can register themselves and create a giving profile if they are not already in the system
- The plug-in will install all the needed templates, CSS, script and user control files
- Arena's Donation Kiosk module is available for both Arena Premium and Arena Select
- Administrators specify as to which funds members can donate
- Administrators can specify the payment gateway to be used
- Administrators can specify the Default Domain for the New Portal
- This plug-in is compatible with the PayFlow Pro payment gateway only

Note: This plug-in is compatible with the PayFlow payment gateway only. Other gateways either only support redirect-based payment options or require data not available from card swipe information which makes them incompatible with the feature. Note that using the PayFlow Pro gateway may have additional requirements of PCI security certification, please contact your gateway provider for more information.

This plug-in has been tested with and is officially supported with Magtek Dynamag (PN: 21073062) Card Readers, but nearly any card reader able to scan to a text field should work.
